Summary || Objective
_____

FullStack Developer with experience in building scalable and high-performance systems using technologies like React, Node.js, and MongoDB.
Proficient in creating dynamic and responsive interfaces, integrating RESTful APIs, and translating functional and non-functional requirements into robust features. Experience in designing and maintaining databases, ensuring performance and filtering valuable data for decision-making.

Collaboration in Agile teams using Scrum, with active participation in Sprints, familiarity with tools like Trello for task management, and knowledge of UX/UI design best practices. Committed to good development practices such as code versioning (Git) and automated testing (Jest).

Seeking a Junior FullStack Developer position to apply my skills, contribute to projects that deliver real value, and grow both in web development and professional.

Languages: Portuguese (Native) || English (Advanced) || Spanish (Intermediary)

Professional Experience
_____

Fullstack Internship - BlueCode Systems (Zambia, Lusaka) 06/24 - 12/24
